

# DYNAMIC REPORT COMPOSER

**Makes composite reporting simple!**

DRC is an unique Business Intelligence tool that allows the **end user** to easily combine **all types** of data from different data sources in one report, document or (web) portal with just a few clicks.

DRC decreases the operational risks, increases the time to market and overall quality of your reports.

## DRC contains three different modules:

### DRC Data Collector

is used for seamless system integration of (third party) information systems. DRC data collector validates all data before stored in a reporting database. Manual intervention in the reporting process is brought back to a minimum!

### DRC Composer

Allows the functional user to combine the prefab report building blocks from the reporting database in user definable templates. Fast and no programming skills needed!

### DRC Portal

uses the same building blocks in websites and management dashboards. Building these portals with validated data is fast and require no programming skills!

✓ Output in HTML, PDF and Excel

✓ All type or management & regulatory reports, factsheets and annual reports

## Benefits:

- ↑ the overall quality of your reports
- ↑ flexibility in reporting
- ↑ time to market
- ↑ competitive advantage

- ↓ the operational risk
- ↓ cost of reporting
- ↓ reporting process
- ↓ technical skills required for reporting
